MEMORANDUM

DATE: April 28, 2011

TO: Ms. Tina M. Bjarekull
Dr. William E. Kirwan
Ms. Elizabeth Kulbicki-Hepler
Dr. Joseph R. Urgo
Mr. H. Clay Whitlow
Dr. David Wilson
College and University Chief Academic Officers

FROM: Elisabeth A. Sachs 
Interim Secretary of Higher Education

SUBJECT: Request for Academic Program

Aberdeen Proving Ground (APG) has asked the Maryland Higher Education Commission (the Commission) to circulate the attached Request for Proposals to all Maryland institutions of higher education. APG has conducted an analysis of the needs their active duty personnel and civilian employees and has determined that there is a requirement for a **Master of Science in Operations Research**.

Institutions have 30 calendar days in which to respond, therefore responses will be due **by May 27, 2011**. Copies of any proposal should be forwarded to both:

Email to: Judy.tredway@us.army.mil

Email to: Acadprop@mhec.state.md.us

Dr. Sue A. Blanshan
Director of Academic Affairs
Maryland Higher Education Commission
410-260-4533

After the May 27, 2011 closing date, APG will consult with the Commission as to whether or not a proposal has been accepted. If none of the in-state higher education institutions submit an acceptable response to the RFP, APG may submit the Request for Proposals to one or more out-of-state higher education institutions. The Commission will need to approve any program from any institution, in-state or out-of-state, utilizing the application and procedures found in COMAR 13B.02.01 and 13B.02.03.

Request for Academic Program (RFAP) - APG

The Maryland Higher Education Commission (MHEC) is working in support of anticipated training requirements at Aberdeen Proving Ground (APG) is soliciting proposals on the following academic program:

Master of Science in **Operations Research**

GOAL: To establish a program to serve the local needs of operations research analysts (ORA) at Aberdeen Proving Ground and a Maryland institution of higher education that will provide academic opportunities in support of the BRAC and future educational needs.

PROGRAM CHARACTERISTICS

- I. Overview: This program will serve a diverse number of organizations at APG that require the skills associated with an advanced degree in Mathematics and Statistics. A diverse set of missions and organizations at APG will benefit from a program or concentration of operations research courses that include design of experiments, probability, statistics, linear and non-linear regression, data analysis, modeling & simulation, operations and risk management. It is desired that the Operations Research Program be structured to allow concentrations in these areas.

Students enrolling in this program will include government employees who have a Bachelors Degree in engineering, math, science or operations research and who are pursuing the MS Degree to enhance their technical capabilities in the missions noted above. The majority of the students will have several years of experience as an ORA in the Government but may include employees who have recently graduated from an undergraduate program (less than 2 years). It is likely that employees of companies providing ORA support services to the APG community would also take advantage of a local program.

- II. Design:
- Must be accredited by one of the following: Association to Advance Collegiate Schools of Business (AACSB), Association of Collegiate Business Schools and Programs (ACBSP), or by the International Assembly of Collegiate Business Education.
 - The partnering institution should provide the students with academic support services
 - The partnering institution shall provide textbook purchasing and registration services at APG
 - Distance learning programs would also be acceptable and provide some degree of flexibility to employees who must balance frequent travel for work with the academic program.

- III. Location: It is desired that programs be conveniently accessible to the workforce at APG and in the APG area (either on the installation or no more than a few miles from the installation)
